PROFESSIONAL SUMMARY

Final-year MCA student with a strong interest in software development, application testing, and problem-solving. Comfortable working with Java, Python, SQL, MySQL, and web technologies, with hands-on experience in testing Android applications and identifying application issues. I enjoy understanding how applications work, finding problems, and learning new technologies to improve my technical skills. Looking for an opportunity where I can contribute to a team, gain real-world experience, and grow as a software professional.

EDUCATION

Master of Computer Applications (MCA)

NMAM Institute of Technology

CGPA: 7.94/10

08/2025 – 06/2027

Nitte, Karkala

Bachelor of Computer Applications (BCA)

Sri Bhuvanendra College

Percentage: 78.75/100

08/2021 – 04/2024

Karkala

EXPERIENCE

Junior Trainee Software Engineer-Internship

Mayonix Innovations

07/2026 – 08/2026

Surathkal

- Contributed to Android application development and testing, gaining hands-on experience in understanding application requirements, implementing features, and verifying application functionality across different scenarios.
- Performed application testing and issue identification, including functional testing, debugging, and retesting fixes, while working with the development team to improve application stability, usability, and overall performance.

TECHNICAL SKILLS

- Programming:** Java, C, Python, PHP, JavaScript
- Core Concepts:** Object-Oriented Programming (OOP), Data Structures, Problem Solving
- Database & SQL:** MySQL, MongoDB, SQL, Relational Database Concepts
- Web Technologies:** HTML5, CSS3, JavaScript, React.js (Basic)
- Application Development & Testing:** Android Development, Functional Testing, Bug Identification, Debugging, Retesting
- Tools & Backend:** Git, GitHub, VS Code, XAMPP, Node.js (Basic)

PROJECTS

Placement Prediction System using Machine Learning

Tech Stack: Python, Flask, Scikit-learn, NumPy, HTML, CSS

- Built a Flask-based web application that analyzes student profiles and predicts placement opportunities using academic, project, internship, communication, and technical skill data.
- Implemented multiple ML models, feature scaling, profile evaluation, model comparison, and personalized recommendations for skill improvement.

SafeRoute — Women Safety Navigation System

Tech Stack: HTML, CSS, JavaScript, Leaflet.js, OpenStreetMap

- Engineered a web-based safety navigation application with real-time location tracking, route mapping, destination search, and nearby safe-place detection.
- Integrated OpenStreetMap and Leaflet.js with SOS alerts, live tracking, safety scoring, and nearby police/hospital identification to improve application usability and reliability.
